MAJOR ORDER ACTIONS, JUNE 1965Suspensions:

Delaware Valley - June 30 (30 FR 8301, 6/30/65). Action deletes the June 30, 1965 termination date of the suspension order which was effective on March 11. This suspension removes a provision of the supply-demand adjutor which would otherwise increase the level of the Class I price 20 cents.

Great Basin - June 14 (30 FR 7893, 6/18/65); June 30 (30 FR 8566, 7/7/65). Two separate suspension actions eliminate for the period of May through July 1965, the percentage requirements pertaining to total route distributions by a pool distributing plant. To be qualified as a pool distributing plant for each month during this period, a plant must dispose of 15 percent of its total Class I disposition on routes in the marketing area.

Minneapolis-St. Paul - June 30 (30 FR 8312, 6/30/65). For the period July 1 through November 30, 1965, the Class I butterfat differential will be 1.25 (instead of 1.35) times the New York 93-score butter price. This will provide a uniform differential throughout the year.

Terminations:

Central Mississippi and Mississippi Gulf Coast - May 1 (30 FR 8312, 6/30/65). Action terminates the "Liquidation" and "Continuing obligations" provisions of the two orders following termination of all other provisions on September 1, 1964.

## FEDERAL MILK ORDER MARKETS STATISTICS

HighlightsJune 1965

Producer Deliveries. A total of 150,242 producers, 9,010 fewer than in June 1964, delivered 4.6 billion pounds of milk to regulated handlers in 69 comparable markets during June 1965. This represents a decrease of 0.2 percent below producer deliveries during June 1964. Average daily delivery per producer increased from 956 pounds in June 1964 to 1,012 pounds in June of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown in table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in the 69 markets increased 1.2 percent from last year to a total of 2.5 billion pounds for the month of June 1965. The average utilization percentage for June was 55 percent, unchanged from last year. Twenty-seven markets showed an increase in the utilization percentage, twelve showed no change, and the remaining 30 markets showed a decrease (see table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, increased 1.2 percent in the 69 markets for the month of June.

Minimum Prices. The weighted average Class I price paid by handlers in the 69 markets for 3.5 percent milk was \$4.59 per hundredweight, eight cents higher than the \$4.51 per hundredweight price in June 1964. Minimum Class I prices in June were higher in 59 markets, unchanged in one market, and lower in the remaining nine markets.

Producers in the 69 markets received a weighted average blend price of \$3.92 per hundredweight for 3.5 percent milk. This is eight cents higher than the June 1964 blend price of \$3.84. Producers received higher blend prices in 51 markets, the same price in three markets, and a lower price in the remaining 15 markets. Class prices, blend prices, and associated butterfat differentials, by markets, are reported in table 1.

Whole Milk Sales. Total in-area whole milk sales for June 1965 in 69 marketing areas are estimated at about 2.0 billion pounds, 0.9 percent above such sales in June of last year. Complete May in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported in table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-June period for the 69 markets was \$4.79, six cents higher than the \$4.73 price in 1964. The 1965 weighted average blend price was \$4.11, six cents higher than the blend price of \$4.05 reported for this period in 1964 (see table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets in table 5. In the first six months of this year, compared to the same period in 1964, producer deliveries for the 69 markets were up 1.3 percent, and deliveries used in Class I were up 1.6 percent. Data for the 69 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-June
